

**SurePower Innovation™** is a full featured property and casualty insurance processing system, based on state-of-the-art architecture.

**SurePower Innovation™** provides total automation assistance for the Personal and Commercial Lines Underwriting, Claims, Accounting, Payables and Billing departments. In addition, the system automates inbound and outbound document management, has a complete web portal to provide enhanced customer service and a comprehensive management vision tool for easy, fast and accurate access to important information.

**SurePower Innovation™** modules are fully integrated to carefully manage all operational and financial aspects of insurance processing, but remain independent to allow companies the choice of which modules they wish to adopt. The system is designed to let insurance companies embrace the benefits from today's superior technology and be prepared for the future.

**SurePower Innovation™ Underwriting** automates your entire underwriting department and its interface with producers. The customer-centric system allows you to rate, quote, issue and manage Property and Casualty insurance policies.

**SurePower Innovation™ Claims** automates your entire claims department. This module manages all

areas of claims adjusting, including reserves, payments, litigation tracking, recoverable tracking, provider management, special investigation unit functions, and fraud detection.

**SurePower Innovation™ Billing** automates the customer billing and collections department. The system completely manages customer and agent billing with comprehensive payment plans and automated non-payment cancellations.

**SurePower Innovation™ Accounting** automates your accounting department. Its suite of reports and data extracts provide all required information to your ledger system.

**SurePower Innovation™ Payables** automates the payables department. The system manages payment processing for all departments.

**SurePower Innovation™ Management Vision** puts the information your management team needs at their fingertips and in the presentation format they want. The system's integrated data warehouse generates precise, custom information to analyze any area of the company's performance, using up-to-date figures and capabilities to "drill-down" to any level of detail desired.

**SurePower Innovation™ Document Management** automates control over paper received and generated by insurance organizations. The system

routes all inbound paper to the right person for processing and archives all generated output for easy retrieval.

**SurePower Innovation™ Web Portals** allow your insureds and producers instant and secure access to policy information. They can make online payments, obtain document copies, and report claims. An easy-to-setup Web interface allows integration into your existing Web presence.

**SurePower Innovation™ Common Functionality** is core functionality throughout all modules including production of all required output, automated task management and workflow, comprehensive authority and security, complete diary and notes capability, integrated data warehousing, integrated correspondence generation and integrated reinsurance

**SurePower Innovation™ Technology** is state-of-the-art and guarantees your company will be ready for the future. Innovation is built in *Java/J2EE* and runs on all major manufacturer equipment and operating systems. Innovation uses *Model-Driven Architecture* allowing a graphical model of the business to control the system. Innovation uses *Model-View-Controller* architecture allowing access to critical business functions from anywhere in the world, using browser-based HTML forms, Adobe PDF forms, even wireless PDAs and cell phones. Finally, Innovation uses *Services-Oriented Architecture* utilizing industry standard XML and open standards for plug-and-play modules that easily interface with other systems, are easily maintained, and easily extensible.
