

SurePower Innovation™ Management Vision

Management Vision puts the information your management team needs at their fingertips and in the presentation format they want. Within seconds, you can analyze your company's performance with up-to-date figures. You can view flexible reporting periods including month-to-date, year-to-date, and inception-to-date as well as many options including written premium, written commission, policy count, incurred loss, paid loss, loss ratio, and other underwriting, claims and productivity values.

The unique drill down feature allows you to isolate and analyze data by any dimension in the system such as agency, branch, policy type, program and combinations thereof. With this information, you can quickly see trends and identify problem areas quickly, in order to make informed decisions.

The core of the Management Vision module is Innovation's integrated data warehouse and user defined data marts. Every action in Innovation updates the system's data warehouse. All requested management summaries create data marts specific to the requested information. Data marts can be kept monthly, daily or current up to the minute. When a data mart is updated an optional alert is sent to the user notifying them that the information is ready to be viewed. Information can be viewed using Innovation's integrated drill-down dashboard query tool or can be

accessed by any third party data query tool.

Features include:

- ✓ Point and click drill down from the highest level summary to the lowest level detail
- ✓ Multiple graphical views of any numbers and statistics
- ✓ Integrated data warehouse
- ✓ Integrated and automatically constructed data marts
- ✓ Experience reporting
- ✓ Loss Development Information
- ✓ Ad-hoc reporting
